

Payoffs/Dereelers

Types of Payoffs

Vertical Shaft- Table type payoff. Specific for carriers, bundles or reels.

Features:

- High speed models available
- Heavy duty construction
- Multiple accumulator options
- Custom configurations

Horizontal Shaft- High speed shaft driven payoff. Specific for reels.

Features:

- Easy roll-on loading
- Quick drive shaft connections
- Heavy duty construction
- High capacity pneumatic accumulator

Rim Driven- Driven on the outside rim of the reel. Specific for reels.

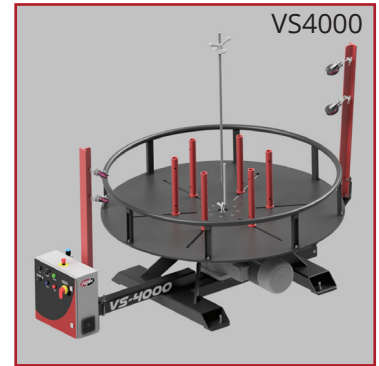

Features:

- Easy roll-on loading
- Small footprint
- Triple loop pneumatic accumulator

Spooler- Small scale payoff. Specific for spools of wire.

Features:

- Ideal for small spools
- Easy loading
- Small, efficient footprint
- Light weight adjustable tension accumulator
- High speed options available
- Custom configurations

Payoff Sizing

Vertical Shaft/Tabletop

- Wire ranges from 0.015" – 0.625"
- Up to 7,000 lb. load capacity
- Table/basket size up to 100"

Horizontal Shaft

HS1200-SS

- 1,200 lb. capacity
- Up to 150 RPM
- Reel sizes from 24" - 32" diameter & 9" - 14" wide
- 1.5 HP. motor

Rim Driven

RD2100

- 2,100 lb. capacity
- Up to 45 RPM
- Reel sizes from 18" - 36" diameter & up to 22" wide
- 1 HP. motor

Spooler

SP75

- Wire ranges from 0.003" - 0.030"
- 75 lb. load capacity
- 170 RPM
- Reel sizes up to 12" diameter & 12" wide

Ancillary Options

- Table catch rings
- Variable pulley sizes and material
- Carrier hold down options
- Handheld jog remotes
- Direct speed control from Torin coilers

Each payoff is designed and built to ensure proper operation with Torin Spring Coilers or other machinery, including integrated safety features between machines. Complete with end-to-end support and service by FENN Torin certified technicians. Payoffs can also be custom engineered to your unique requirements.
