## Retrofit Program for W Series Mechanical Coilers

FENN's Electrical Retrofit program provides unmatched value: our highly knowledgeable, experienced engineers and factory technicians enable FENN to deliver retrofitted equipment at a **fraction of the cost of a new machine**. Let us help you maximize the potential and output of your mechanical Torin Spring coiler with our CNC technology, all backed by our **1 year retrofit warranty!** Retrofit benefits include:

- **Precise, variable speed servo control** of feed and cam shaft independently, allows for cam shaft reversals and eliminates need to change gears or adjust feed crank gears, clutches and brake.
- Variable speed and position control of the cam shaft enables **greater flexibility when making complex springs** such as multiple diameter changes. This also enables you to expedite set up by adjusting the timing of the cam shaft via offsets in the spring program rather than re-clocking the cams mechanically.
- **Unlimited accurate feed length** provided by precise servo control- without change gears
- **Integrated probe** interface enables precise clocking of springs
- Retrofitted machines become simplified with **fewer mechanical parts that need future replacement**. Clutches, brakes and feed crank gears are all eliminated
- **Valuable mechanical parts** that become obsolete in the retrofit process are crated and shipped back to you for use on other machines, or disposed of at your discretion
- **High quality OEM parts** keep your Torin machine running at optimum performance
- Save time and labor when you **reduce set up time** with modern Torin programming
